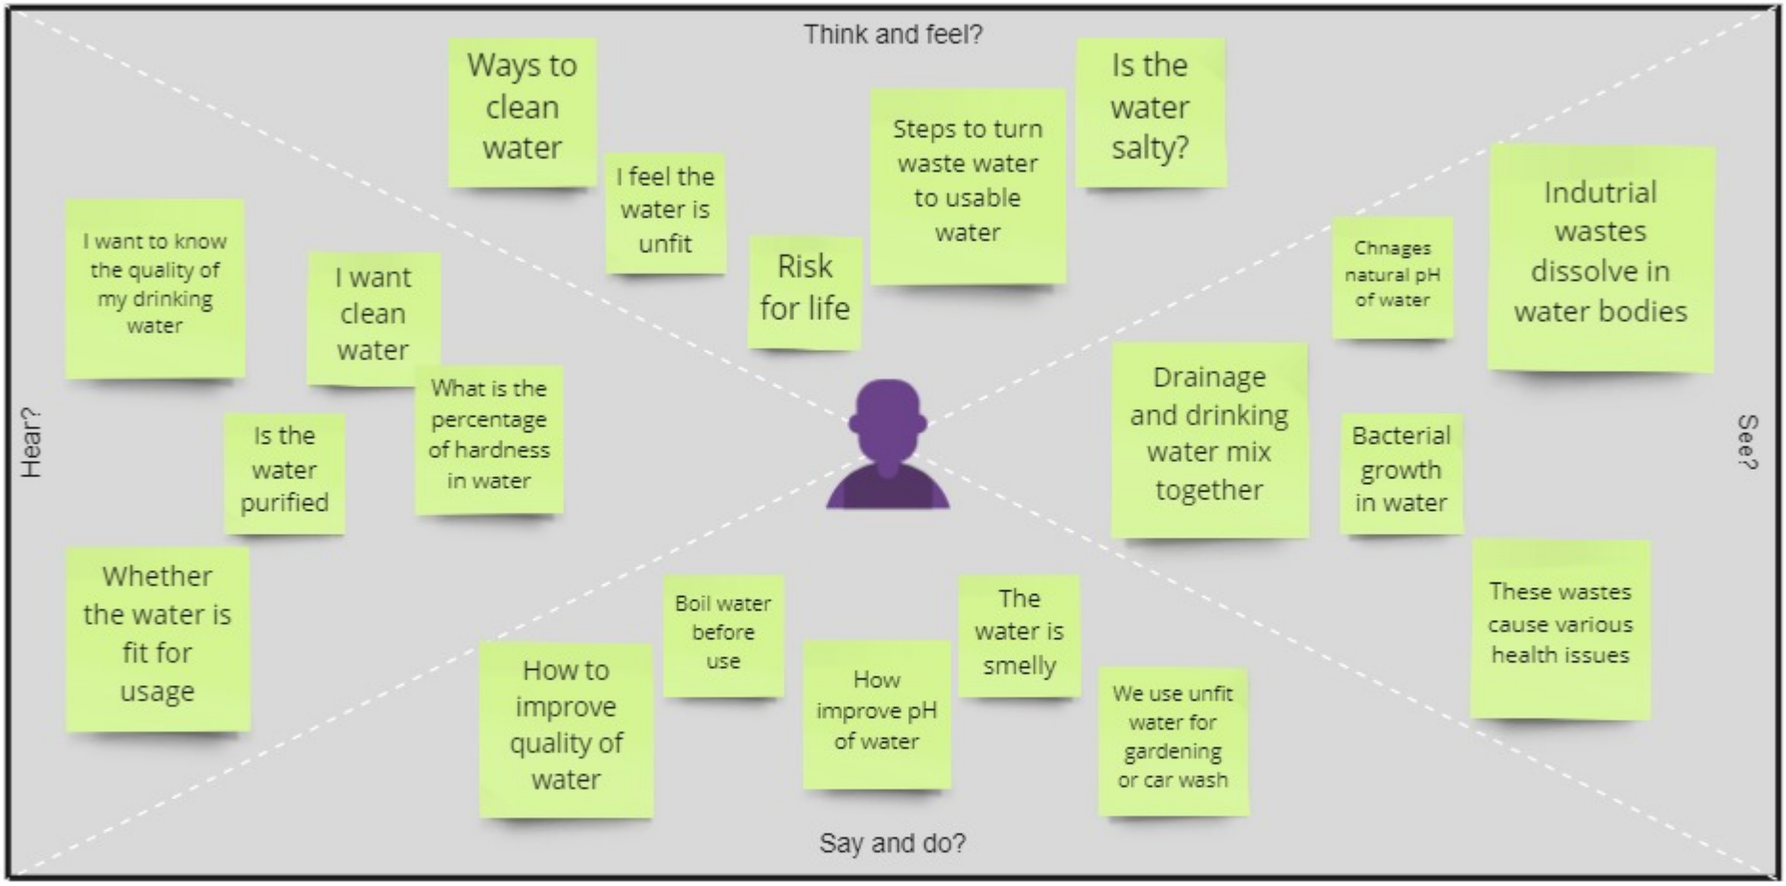
EMPATHY MAP

Efficient Water Quality Analysis and Prediction



PAIN

Lot of countries face water scarcity.
Water is not sufficient for human and environmental civilization
we are in urge to save and purify freshwater.
Less accuracy in quality may cause serious issues.
Usage of unfit water may cause health issues

GAIN

Water is a precious resource
Life becomes impossible without water
Quality of water is very much required to classify its purpose of usage
Analysis helps is identifying a water whether it is fit or not
