

EMPATHY MAP

Efficient Water Quality Analysis and Prediction

PAIN

- * Lot of countries face water scarcity.
- * Water is not sufficient for human and environmental civilization.
- * we are in urge to save and purify freshwater.
- * Less accuracy in quality may cause serious issues.
- * Usage of unfit water may cause health issues.

GAIN

- * Water is a precious resource.
- * Life becomes impossible without water.
- * Quality of water is very much required to classify its purpose of usage.
- * Analysis helps in identifying a water whether it is fit or not.
